

RE: NAB petition 04-160  
Dear FCC:

Please reject this petition and keep your hands off of satellite radio. A listener should be allowed to determine which programming they are willing to purchase without undo regulation. Satellite radio provides a listener a choice without advertisers selecting what the listener wants to hear. Traffic and weather updates are just as important to the satellite listener as they are to those who chose to listen to commercial channels. Please leave this subject alone.

Thank you, T E Cone
